

Figure 1

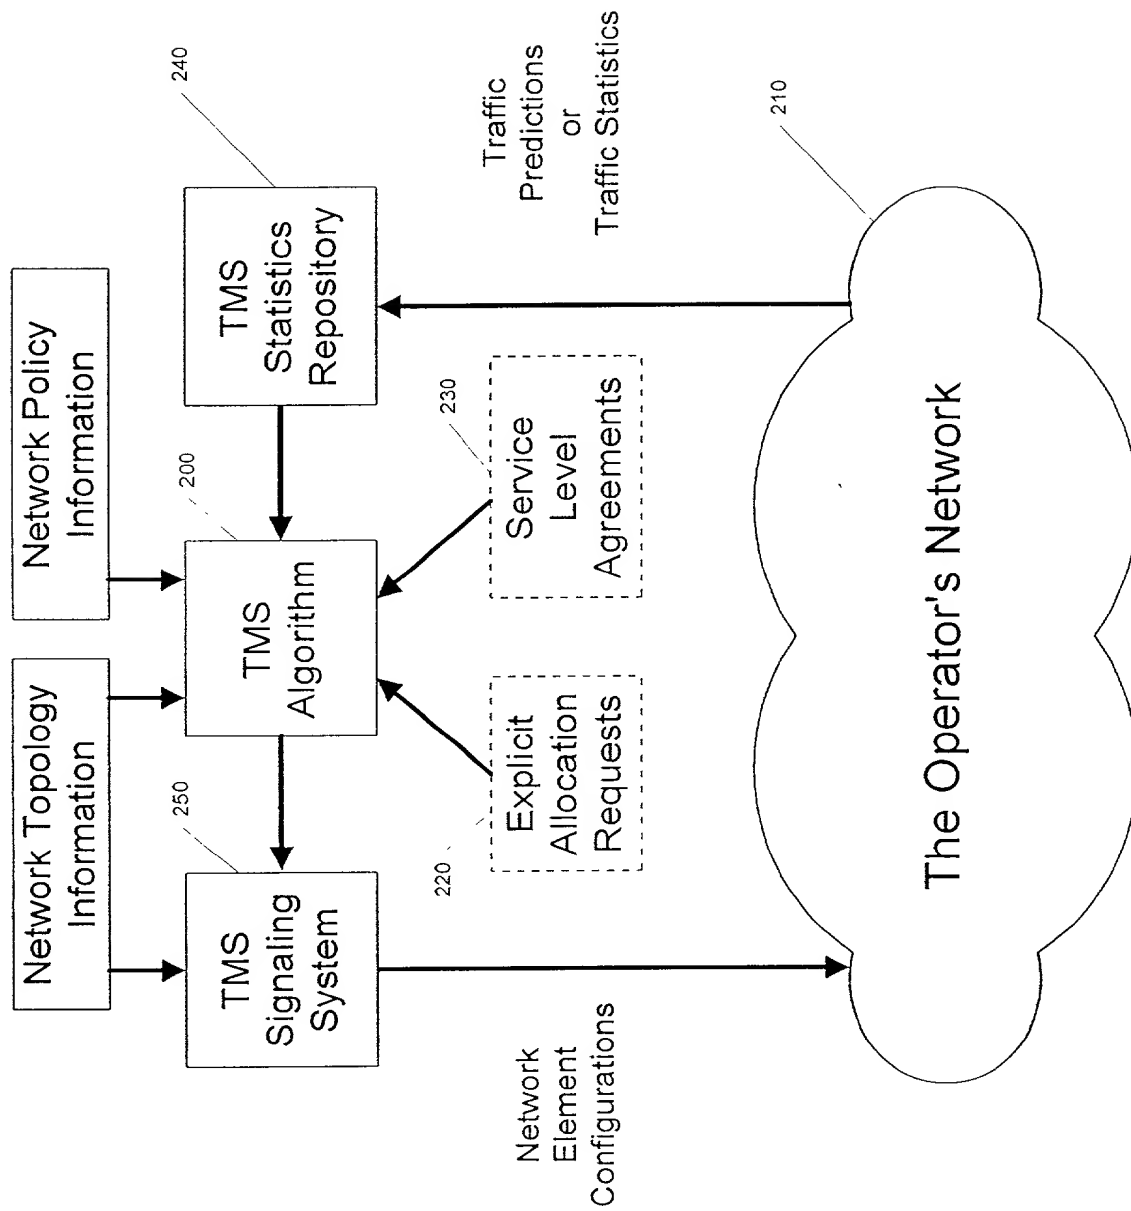

Figure 2

Figure 1 displays 12 histograms arranged in a 6x2 grid, showing the distribution of the number of non-zero elements in the vector  $x$  for different values of  $n$ . The columns are labeled  $n=100$  and  $n=200$ . The rows are labeled with the number of non-zero elements: 1, 2, 3, 4, 5, and 6. The x-axis for each histogram is labeled  $x$  and ranges from 0 to 100. The y-axis is labeled 'count' and ranges from 0 to 100. The distributions are centered around the number of non-zero elements, with the peak count increasing as  $n$  increases.
